

Self-Propelled Stand-ON Power Unit

RH-8024

STAND-ON OPERATION
W/ Aux Hydraulics

HYDRAULICS:

SPEED CONTROL:

PTO:

Forward
Neutral
Reverse

TRACKS:

Dual ZT-5400 Hydro-Static
Drives 19:1 Reduction
Variable Speed
Forward
Neutral
Reverse
Zero-Turn Control

Tracks:

7"x44" Ground Contact

TORQUE PTO:

PTO: 225 Ft/Lbs

HYDRAULIC RESERVIOR

10 Gallon for
cool operating
Temps.
W/Aux Ports

WEIGHT: About 1100bs

Provides great traction
in off- road conditions

ENGINE: 24hp V-Twiin

Electric Start

Field proven to clean 10 to 15 culverts in one day. Richland Parish cleaned 30 culverts in one day with their unit. They have owned the Hydraulic unit for over three years and had a direct drive smaller unit for seven years prior to that.

MoDot paid for their unit in MONTHS by the savings of not cutting roads and replacing culverts. The Rota-JETTER is the ONLY JETTER on the market that has Hydraulic Powered Rotational Tools. The Tools do the heavy work. We used water but very sparingly!! One culvert takes from 30 to 60 gallons. Other JETTERS can use hundreds of gallons on one culvert!
